

Motel Coach Resource: [Booking.com](https://www.booking.com) Audit Checklist

Booking.com Audit Checklist for Motels (2025 Edition)

1. Property Content & Visuals

- ☐  **Achieve a 100% Content Score:** Ensure all sections are fully completed, including amenities, policies, and descriptions.

Our Tip : The better your Content Score the higher your Motel will rank in your City, and the less you will need to compete on other factors to rank high (Price and promotions etc).

- ☐  **Upload High-Quality Photos:** Provide at least 10 high-resolution images per room type, covering various angles and facilities.

Our Tip : High Quality photos = Higher Click Through Rate (CTR) to your listing on [Booking.com](https://www.booking.com), Higher CTR = Higher Ranking on [Booking.com](https://www.booking.com). CTR indicates how relevant you are to the people searching, high CTR = more relevant and appealing.

- ☐  **Optimize Descriptions:** Use clear, keyword-rich descriptions that highlight unique features and local attractions. [cogwheelmarketing.com](https://www.cogwheelmarketing.com)

2. Pricing & Availability

- ☐  **Keep Calendar Updated:** Regularly update availability to prevent overbookings and ensure accuracy.

Our Tip : [Booking.com](https://www.booking.com) wants to show properties that have more rooms available than less as they can potentially make more profit.

- ☐  **Competitive Pricing:** Adjust rates based on local market trends and demand to remain attractive.

Our Tip : Understand your pricing compared to your competitors, your price creates a perception of your quality, and when combined with your reviews, photos and descriptions will make the case for guests to book your Motel. Your pricing should match up with the pricing in your Restaurant, if you are a budget Motel - then having a 5-star restaurant with expensive meals might not work.,

- ☐  **Activate Mobile Rates:** Offer special rates for mobile users to capture last-minute bookings. otamiser.com

Our Tip : We don't promote any of Booking.com's promotional tools for any property but we do suggest testing what works for your Motel.

3. Guest Reviews & Engagement

- ☐  **Encourage Reviews:** Prompt guests to leave reviews post-stay to build credibility.
- ☐  **Respond Promptly:** Address reviews professionally and timely to show attentiveness.
- ☐  **Monitor Review Scores:** Aim for a high average score by consistently delivering quality service. medium.com

Our Tip : We additionally like Motels to leverage their Booking.com Reviews to drive additional Google Local and Trip Advisor Reviews.

4. Trial different Booking.com Tools and test them on their performance.

- ☐  **Preferred Partner Program:** Join to gain increased visibility and access to exclusive features.

Our Tip : Increases your commission costs but drives more visibility. If you are in a town with only a few motels then the value here is not justified, if you are in a competitive town with a lot of Motels then it might be worth reviewing what increase in Bookings this will drive.

- ☐  **Visibility Booster:** Use this tool during low-demand periods to enhance listing prominence.

Our Tip : The key here is testing, Booking.com's key metric is their own performance, not driving additional revenue for your Motel - be careful when using their promotional tools and set targets if you do pay higher commissions or give discounts.

- ☐  **Extranet Opportunity Center:** Regularly check for personalized suggestions to improve performance.

5. Operational Excellence

- ☐  **Swift Communication:** Maintain a high response rate to inquiries and messages.

Our Tip : [Booking.com](#) wants to book their guests into Motels that communicate promptly, effectively and are good to deal with. That is one of the key drivers for guest satisfaction.

- ☐  **Minimize Cancellations:** Implement flexible policies to reduce cancellation rates.
- ☐  **Analyze Performance Metrics:** Regularly review analytics to identify areas for improvement.
